\$144,916.63	Completed	March 2020 – February 2021	\$144,917.63

### Project Description

To evaluate herbicide tolerant and conventional soybean variety suitability for regions in Saskatchewan – yield, maturity, and protein content to be evaluated.

### Outcome

Data is reported annually and incorporated into long-term means, which are published in Seed Guides.

### Research Objective

#### OBJECTIVE 1

To evaluate herbicide tolerant and conventional soybean variety suitability for regions in Saskatchewan – yield, maturity, and protein content to be evaluated.
